Automatic Control Theory – Exercises review and translation

Background:

At the institute of Flight System Dynamics, we are preparing a new course on Automatic Control Theory for the Bachelor's of Aerospace program. In this framework, we are preparing the materials for the course, including exercises and tutorials. All the materials are already available in German and they need to be translated into English.

Tasks:

- Review the exercises and tutorials
- Translate the exercises and tutorials from German into English

Required Profile of Qualifications:

- German native speaker
- Fluent English speaker
- Good knowledge of control theory
