Join our team as:

Test Coordinator

You create trust in our technology.

Location	Ismaning
Department	Engineering
Working Time Model	Full-time
Start Date	Immediately

A job with high responsibility: You can make the difference and drive our development artefacts to flight readiness. With your help, we decide whether it is safe to test a new version of e.g. a flight controller or any other safety critical function in-flight. It will be your responsibility to coordinate the testing team and assure the provision of testing-reports in-time according to project milestones. In case you detect bugs, it will be your task to work in close collaboration with the design engineers until you can approve the implementation and hand over to your colleagues of the flight operations department.

Tasks

- Test and verification activity planning
- Coordination and test engineering team supervision
- Test case definition based on requirements
- Test case implementation and test setup
- Test case execution, evaluation and bug reporting
- Test case documentation
- Continuous activity tracking and report to relevant panels

Qualification

- Degree: Completed studies (Master) in the domain of mechanical engineering, aerospace engineering, electrical engineering or comparable programs.
- Experience: At least 3 years in aerospace industry or in the domain of embedded system testing in other industries
- Method-Knowledge: V-model, model-based design, model-in-the-loop, hardware-in-the-loop, validation and verification process
- Tool-Knowledge (mandatory): Microsoft Office, MATLAB/Simulink
- Tool-Knowledge (optional): Polarion, ADS2, GIT

Benefits

- Team with high spirit and pace
- Company laptop
- Flexible working time model
- Staff restaurant

Application Documents

- Letter of motivation
- Curriculum vitae
- Certificates / reports / references
